THE

WORKING MEN'S COLLEGE,

LONDON.

THIRTEENTH REPORT,

A.D. 1889.

Price Twopence.

Prepared by the Executive Committee, under the authority of the Council.

THE WORKING MEN'S COLLEGE,

GREAT ORMOND STREET, BLOOMSBURY.

FOUNDED IN 1854, BY THE LATE FREDERICK D. MAURICE.
INCORPORATED IN 1874.

OBJECTS OF THE COLLEGE.

The Students are, for the most part, working men, and the Teachers are, in general, members of the Universities and of the different professions, or those who have themselves been students in the College. Its purpose is to unite these classes together by associating them in the common work of teaching and learning. It provides instruction at the smallest possible cost (the teaching being almost wholly unpaid) in the subjects with which it most concerns English citizens to be acquainted, and thus tries to place a liberal education within the reach of working men.

Principal.

*SIR JOHN LUBBOCK, BART., D.C.L., LL.D., M.P., F.R.S.

Vice-Principal.

*REGINALD J. MURE, M.A., CHRIST CHURCH, OXFORD.

Council.

G. ROWLAND ALSTON, M.A., LL.B., St. John's Coll., Cambridge.
*M. CABABÉ, B.A., Balliol Coll., Oxford.

THIRTEENTH REPORT

OF THE

WORKING MEN'S COLLEGE.

Introductory.

DURING the nine years that have elapsed since the issue of the last Report, the work of the College has been carried on in accordance with the principles laid down by Mr. MAURICE and his colleagues at its foundation in 1854. The teaching, mainly voluntary, has been conducted by university men, professional teachers, and certificated and advanced students of the College itself. The majority of the students have been working men, the minority being composed of clerks, teachers, tradesmen and others. The principle of associating men in such various ranks of life in the common work of teaching and learning—a principle to which the highest importance was attached by the founders—has been strictly adhered to. The maintenance, side by side with the systematic education given in the classes, of a common life by means of association outside the class-rooms, has been constantly kept in view, and this association has served as a valuable instrument for promoting that true education which was desired and aimed at by the original founders. The result has been the strengthening of the "friendly and corporate spirit" which was so prominent a feature of the College in its early days. Teachers and students feel that they are in active sympathy with each other, and are members of a common body with a common aim—namely, the extension of education amongst those citizens who have no other means of so fully and freely obtaining it.

The chief difficulty, with which the Council have had to contend in prosecuting its work, has been want of money. The impossibility of giving education at prices which would place it within the reach of the class for whom the work was intended, and at the same time of making the College self-supporting has been brought out more strongly than ever during the last few years. The poorer working men cannot pay fees large enough to meet the requisite expenses, even though the teaching is in the main voluntary. The consequence has been a perpetual recurrence of annual deficits, which have had to be met from time to time by resorting to the capital fund. This want of means has seriously crippled the Council in carrying on their work. The effort to extend the College teaching outside the College walls, which will be referred to later

on in this report, has been materially hindered. The completion of the College buildings has been of necessity abandoned for the present, and other limitations of the work have been imposed by the slenderness of the College funds.

Two years ago the Council, feeling that the position was serious, took the step of slightly increasing the fees, but the experiment was unsuccessful, as it resulted in a considerable diminution in the number of students. After again anxiously considering the whole question, they determined to reduce the fees to such a level as would bring the College education within the reach of men of very limited means. A scale was adopted which now appears on the whole best to suit the means of the students on the one hand, and the financial position of the College on the other.

Three terms have elapsed since this reduction of fees, and it is found that, owing to this change, and no doubt also in some measure to increased advertising, the numbers have been larger (with one exception) than they ever were before, and that the receipts have not suffered. Nevertheless the annual deficits must recur, unless money can be obtained from other sources than students' fees.

The College thus being in urgent want of funds, it has been determined to issue an appeal for assistance in carrying on a work which could undoubtedly be made of even greater use to the community in the future than it has been in the past. Such an appeal therefore is issued concurrently with this report.

The Principalship.

In reviewing the incidents of the past nine years, the Council have in the first place to record Mr. Thomas Hughes's resignation of the Principalship, which took place in 1883, on his acceptance of a County Court Judgeship, and consequent removal to Chester. In him the College lost one of its original founders, who had supported it and worked in it with little intermission for twenty-nine years—who had always been found a most ready advocate of its interests, and one of its staunchest and most trustworthy friends. In the words of the address which was presented to him on leaving, he was "the man "whom all felt to be the natural successor" of Mr. Maurice, and "his leader-"ship signified the maintenance of all that was best in the spirit and traditions "of the College."

He was succeeded by the present Principal, Sir John Lubbock, who, as the Council gladly and gratefully acknowledge, has, notwithstanding the many demands upon his time, maintained an unfailing interest in the College, and has given a close attention and the fullest sympathy to its affairs; winning in return the confidence and regard, as well of the students as of those engaged in the work of managing and teaching.

Organization of Classes.

In 1884 the system of teaching then pursued in the College was discussed at much length; and the Council, considering that it was becoming too much a group of individual classes, deficient in completeness and in mutual connection, appointed a Committee to report on the whole question, and to prepare a scheme for reorganizing the classes, and marking out a more regular course from the lower to the higher branches of instruction.

The existing Plan of Study is the result of the work of this Committee. The Classes are grouped in three divisions, viz.:—

I.—The Preparatory Division.

II.—The Lower Division.

III.—The Higher Division.

The Fees are now as follows:—Half-a-crown per term (of about twelve weeks) admits to each and all of the classes in the Preparatory Division, and to any one class, except Art and Modern Languages, in the two other Divisions, and gives also full membership with all the privileges of the College. One shilling is payable for every additional class, excepting again Art and Modern Languages. In these latter subjects half-a-crown is payable for the first and for every additional class. The fees may, if so desired, be paid by instalments. Fees.

To revert to the three Divisions in more detail:—

I.—The Preparatory Division is, as its name suggests, ready to take charge of any who come, however rudimentary may be their knowledge. The Division is conducted entirely by volunteer teachers, the majority of whom are, or have been, students of the College. The Classes are held five nights a week, and the students must attend at least two. This is considered necessary, as it is just these elementary students who find the greatest difficulty in working out of class, and are in most need of continual help. Two nights a week are given to Arithmetic, two to Writing and Elementary Grammar, and one to Reading aloud. At the end of each term the students are examined; those who pass are advised as to what studies they should next pursue; and to the two best are awarded Scholarships enabling them to continue their work at the College for a year without the payment of any fees. The number of those who entered for this Division during the term ending Christmas, 1888, was 101, whilst in the first term of the institution of the Division (January, 1885) the number was 33. Preparatory Division.

II.—The Lower Division takes up Arithmetic and Grammar where the Preparatory Classes leave off, and is so arranged that students can pass into it at the end of any term and find a class suited to them. There are thus at present three Arithmetic and two Grammar Classes, each intended to complete its course in a year. There is, besides, an Elementary History and Geography Class. The teaching has throughout been modernized and made systematic; exercises are set to be prepared out of class, and students have the advantage of finding on two nights a week a room in the College set apart for their preparation, and teachers ready to give them help individually in their difficulties. The entries for this Division in the term ending Christmas, 1888, were 159, viz., 84 for Arithmetic, 17 for History, and 58 for Grammar. Lower Division.

III.—In the Higher Division are taught Languages, Literature, History, Law, Mathematics, Science, Art, &c. Before entering upon any subject in this Division students are required to have sufficient preliminary knowledge to enable them to profit by the teaching. In default of this they are recommended by the teacher to join or to remain in the Lower Division. The total, Higher Division.

number of entries in the term referred to was 540. Of these no less than 142 were for the always attractive French classes. Mons. PETRÉ, who has special charge of these classes, thus reports with regard to them:—

> "I am very happy to be able to report favourably on the present condition of the "French classes. We have now seven of them going, more than ever before.
>
> "The attendance is very good, the work well done and carefully prepared by the "practice class masters. I cannot speak too highly of the zeal and ability of these "gentlemen, and of their devotion to their self-imposed duties."

Mons. PETRÉ then mentions the formation of a French circulating library for the students, comprising already several hundred volumes, and the starting, under the name of conversational practice, of a French debating society, meeting every week.

Practice Classes, both those in French to which Mons. PETRÉ refers, and others in different subjects, are of old standing in the College. They have been found of practical utility, especially for the more elementary students, and they help to keep alive that spirit of comradeship to maintain which is one of the purposes of the College. They are conducted almost entirely by present or former students.

The other languages taught in the College are Latin, Greek, and German. These classes are, as might be expected, smaller than those in French, but as a specimen of their progress the following report on the Greek class by Mr. SHAW is given:—

> "The Greek class has steadily increased in numbers every year. We can regularly "count on a dozen students every Friday now. But more significant is the fact that "it is the same dozen who come every week, showing that the study of the language "is taken up in a serious and not merely an amateur spirit. For this reason we have "not, with the bulk of the students, attempted anything beyond selected episodes for "translation from Greek into English; the object being to found students securely on "a thorough knowledge of the elements; though of course one must be careful not "to exhaust the patience of the class by keeping them too long to the drudgery of "the subject. As a matter of fact, however, it is clear to me that the students are "themselves anxious that the knowledge should be thorough and scholarly, and are "quite willing to take the necessary time in the matter. There is every reason to "hope that in a year or two the Greek classes may include students in every stage of "proficiency and progress, from those just beginning the grammar to those able to read "and appreciate Plato and Thucydides."

Another group is formed by the classes in English Literature and Composition, History, Law and Political Economy. With regard to the first-named subject, Mr. JACOB's report may be interesting:—

> "The study of English Literature is not one that is specially attractive to working "men. The class is small, numbering from six to a dozen in different terms. The "men have attended regularly, and taken considerable interest in their work. Most "of them have satisfactorily passed the examinations held at the end of each year's "course. There has been no attempt made by means of lectures to give the students "a stock of ready-made opinions in literature, but the works themselves have been "read in class, explained, and exhaustively discussed. We have thus in the last four "years read not a little of Chaucer, Spenser, Shakspeare, Milton, Dryden, and Pope, "and shall proceed next October to the poets of this century."

Lectures on Co-operation.

Under the head of Political Economy an interesting series of lectures on

"Co-operative Life" was delivered in the term commencing last January. This series was delivered by various lecturers of repute, not on the staff of the College; the last lecture having been given by Mr. Thomas Hughes, the former Principal. The average attendance was about 40.

The Council desire here to express the pleasure with which they regard the re-establishment of a connection between the Co-operative movement and the College. It was out of that movement that the College itself sprang in 1854, and the Council have great hope that mutual advantage will follow from the fact that the College is again in closer relation with co-operative bodies.

For the classes and lectures in various branches of scientific knowledge, there were about 80 entries in last October term. The subjects vary from year to year. In 1882 the College sustained a loss not easily repaired in the too early death of Mr. Dunman, whose success in teaching and attracting students to these branches was especially noteworthy.

The other classes consist of those in Art, in Mathematics, in Bookkeeping, and in Shorthand. The last named class, attracting no fewer than 96 members, is entirely in the hands of those who are, or have been, themselves students in the College.

Examinations.

The system of examination is fully explained in the General Prospectus, and a list of results for the past three years is given in the Appendix. Whilst it is of course desirable that a larger number of students should present themselves for examination, it is felt that, considering the limited time at the disposal of the students, the results are on the whole satisfactory.

Teachers.

In concluding this account of the system of teaching, the Council are glad to mark how great a share of the work is gratuitously undertaken by former students, and in some cases by present students of the College. The former students are largely represented on the Executive Committee.

With regard to the rest of the teaching work; in the Science and Art classes the teachers receive the Government, or "South Kensington," grant; the College pays the teachers of modern languages; and the remaining classes —chiefly in the higher subjects—are voluntarily taken by graduates of Oxford or Cambridge. Relations with the old Universities have been continuously maintained, and the supply of teachers from that source is seldom found wanting.

Much voluntary work other than teaching is also done for the College, and in this connection the Council desire to record its sense of the exertions of the Advertising Sub-Committee (consisting almost entirely of students) who voluntarily undertook and most efficiently carried out a large amount of work in the way of posting placards and distributing handbills throughout the neighbourhood, the want of funds having rendered it impossible to resort to paid advertisements to any appreciable extent.

Numbers of Class entries and Students.

The number of students has of late very considerably increased; indeed the totals of class entries during the past year have rarely been equalled during the whole career of the College. Details will be found in the tables in the Appendix. It will be seen from these that in the last October term there were

800 class entries, and that the number of actual new students entering during
Ages. the three terms of the current year was 671, or whom 237 were under 20 years of age, 229 between 20 and 25, 110 between 25 and 30, and the rest of various ages, up to a single student of over 65.

In another table a list of the employments of the above 671 students is given.

he Library. The Library is open from 7 to 10.30 p.m., and has an average daily attendance of between 30 and 40. It contains over 4000 volumes, and has been reorganized by the present Library Committee. Useless books have been cleared out, the best works on various subjects have been obtained through gifts or by purchase, and it is becoming an excellent library for the general student as regards both reference and research. The sum, however, which the College is able to devote to it annually is but a pittance.

The Museum. The small Museum remains, as it has done for some years past, under the care of Mr. Grugeon. It contains chiefly objects of natural history for the use of teachers of the science classes. The bulk of the collection was made by students in the early years of the College, but several additions have been recently made by gift.

Saturday night Lectures. In addition to the regular teaching, Free Popular Lectures are given on each Saturday, from October to March or April. These are open to the general public, and thus form to a certain extent a recruiting ground for the College. They also serve to awaken among some who for various reasons may not care or be able to attend the classes, an intelligent interest in the different subjects there treated. To the many distinguished men who have so readily devoted evenings to this purpose, the Council gladly take this opportunity of expressing their sincere thanks. A list of the lecturers during the last three years is appended.

Extension Classes. In 1885 the Council endeavoured to make further use of the teaching power at their disposal by establishing a system of what has been designated "Class Extension." Single classes on various branches of knowledge have been formed, and teachers provided, in many places scattered throughout London and the suburbs, where a request for them has been made by a club, institute, business firm, co-operative society, committee, or some other body with which the College could deal. This system, while involving a very small outlay, effects much useful work, and serves to make the College more widely known. The demand for classes is fluctuating and irregular, but the system is thoroughly elastic, and can be readily expanded from time to time in different districts, as demands arise. Classes have been carried on in English History and Literature, Constitutional History, French, Shorthand, Political Economy, Arithmetic, Building Construction, Applied Mechanics, Geometry, Electricity, Chemistry, Geology and Physiology, at various centres in the following places:— Acton, Barnsbury, Bermondsey, Brixton, Clerkenwell, East Finsbury, Hackney, Hammersmith, Kennington, King's Cross, North Kensington, Peckham, Seymour Place (Bryanston Club), Surrey Commercial Docks, Walworth, Wandsworth, West Kensington, West Marylebone, Wigmore St. (Messrs. Debenham and Freebody), Wimbledon, Woolwich, and York Road (Messrs. Whellens).

In the course of the year 1887 a proposal was made from South London that the College should establish a branch in that district. The requisite pecuniary guarantees, however, could not be obtained, and the project was abandoned; but shortly afterwards the College was asked to assist in carrying on the classes held at the Royal Victoria Hall, Waterloo Bridge Road, and four members of the Executive Committee here were nominated as members of the Class Committee at the Hall. A College, to be called "The Morley Memorial Working Men's College" is about to be founded there, with the help of a subsidy to be furnished by the Charity Commissioners. The new College will be in some respects on the lines of this one, and it is hoped that some link will be maintained between the two.

Proposed Branch in South London.

Royal Victoria Hall.

The Council of the College, like the governing bodies of other institutions, have been in communication with the Charity Commissioners in reference to the City of London Parochial Charities Fund. A memorial praying for a grant or subsidy out of that fund was presented in December, 1887, and in the following February a deputation in support of it was received by the Commissioners; but up to the present time there has been no definite reply.

It was considered desirable that some part should be taken in "The Summer "Meeting of University and other Students at Oxford," held last year in the month of August. Tickets admitting to the courses of lectures, &c., at Oxford were offered to certain selected students, and five were ultimately given. The Council have to thank the authorities of Keble College for their kindness in receiving those students within their walls.

Oxford Summer Meeting.

To the Common Room, and the part which it plays in the life of the College, much importance has always been attached. It has been a tradition from the earliest beginnings that the house in Great Ormond Street should be a social centre; a place where ideas should be exchanged, and where acquaintances should be formed that might ripen into enduring friendships. It has been wished to reproduce, so far as the locality and other circumstances would permit, the life and spirit of a College at the old Universities. The Common Room has afforded a meeting place for students and teachers, and has assisted most effectively in preserving the traditions and carrying out the objects of the College. It may be mentioned that during the past winter its attractions have been added to by the debates that have been held on alternate Fridays.

The Common Room.

Excursions in July have been held as heretofore every year, with one exception; Oxford, Cambridge, Canterbury, Winchester, Windsor and Arundel have been visited.

Excursions

The Old Students' Club, which meets from time to time in the winter, has been found very effective in keeping awake an interest in the College doings amongst men who have long ceased to attend on ordinary occasions; and the supper, which takes place shortly before every Christmas, has become the chief, and the most popular gathering of the teachers, students, officers, and old members of the College, in the year.

The Old Students Club.

Evening Conversaziones have from time to time been held in the large lecture room. The last was held in January of the present year, on an occa-

Evening Conversaziones.

sion which the Council are glad to take note of. An address and testimonial, subscribed to by a large number of members of the College, was on that evening presented to Mr. and Mrs. TANSLEY in commemoration of their silver wedding; and it was announced by the Principal that the Archbishop of CANTERBURY, in compliance with a memorial, proposed to confer on Mr. TANSLEY the degree of Master of Arts, as an appropriate public acknowledgement of the invaluable and disinterested services which he had rendered at the College "to "the cause of good learning and earnest thought among the working classes."

Degree conferred on Mr. Tansley.

This degree was accordingly, conferred on May 11th, in the Library of Lambeth Palace. About 60 members of Council, teachers, and students of the College were present at the ceremony.

Maurice Rowing Club.

There is a Maurice Rowing Club, which takes its name from the founder, and also a Maurice Football Club.

Conclusion. Prospects of College.

In conclusion, a word may be said as to how the prospects of the College are likely to be affected by the various schemes for the better education of the industrial orders, that are now engaging public attention.

Pioneers must expect that amongst their followers some will become their competitors. But the College has not found that its functions have been superseded by other agencies, or that there is less need than of old for the work done within its walls. The establishment in the London Board Schools of evening classes open to adults, has made no appreciable difference; so vast is the field in which work of that kind is called for.

The large institutions known as "Polytechnics," which are now rising in certain quarters of London, may in some respects cover the same ground, but the students there will be on the average younger, and the education will be to a far greater extent of a technical character. As these new institutions develope themselves, some methods of co-operating with them, and where necessary, of adjusting the work of the College for that purpose, will probably be arrived at.

The College will never want opportunities for usefulness; and there are many indications that its work is likely to expand rather than diminish. If funds permitted, it would be able to meet advantageously any increase in numbers by taking the next house (which already belongs to it, but which is on lease terminable at certain fixed periods at the option of the College) into its own occupation.

In one essential respect the College will always retain a distinctive character. Its main object, as prescribed by the Articles of Association, is "to place a "*liberal* education within the reach of the working classes." The Council believe that the amount of public attention and assistance now given to purely technical education renders it more than ever incumbent upon them not to lose sight of this object.

Held in Term beginning Oct. 1, and ending Dec. 15, 1888, with the Fees.

PREPARATORY DIVISION. Class Fee 2/6, covering Term Fee.

For teaching the subjects required for entrance into the other Divisions. The Term Fee of 2/6 admits to each and all Classes in this Division.

Director of Studies:—GEORGE TANSLEY, M.A., Coll. Fell.

Monday, 8-9.—*Writing.* 9.10.—*Dictation and Elementary Parsing* ... ... E. R. COLE, C.S.
Tuesday, 8-10.—*Arithmetic (Numeration and first four rules)* ... ... J. J. KAYE, C.S.
Wednesday, 8-9.—*Writing.* 9-10.—*Dictation and Elementary Parsing* ... ... JAMES MILNE.
Thursday, 8-9.—*Reading (advanced).* 9-10.—*Reading (elementary)* .. .. G. W. FOX, C.S.
Friday, 8-10.—*Arithmetic* ... . W. COOK, C.S.

NOTE.—Students in this Division must attend two nights a week, and are strongly advised to attend all five.

LOWER DIVISION.

For teaching the subjects required for entrance into Higher Division. The Term Fee of 2/6 admits to any one class. Each additional class 1/. per term. Practice and Preparation Classes free to members of this Division.

Director of Studies:—LIONEL JACOB, B.A.

Monday, 8-10.—*Arithmetic.—Elementary* ... ...GEORGE TANSLEY, M.A., Coll. Fell.
Monday, 8-10.—*Arithmetic.—Advanced (Decimals)* ... ... LEONARD POCOCK, C.S.
Tuesday, 8-10.—*Outlines of English History and Geography* ... ... J. M. NICHOLSON, C.S.
Wednesday, 8-10.—*Practice and Preparation Class* ... ... J. W. HANRAHAN, Sen. Stu. and E. J. WESTROP, C.S.
Thursday, 8.10.—*English Grammar.—Elementary* ... ... HERMANN A. HAINES, M.A.
Thursday, 8.10.—*English Grammar.—Advanced* ... ...
Friday, 8-10.—*Practice and Preparation Class* ... ...H. EVANS, C.S. and F. MILNE, C.S.

Students in this Division should make a point of attending the Practice and Preparation Classes, and should not take up more than two subjects at one time.

HIGHER DIVISION.

Director of Studies:—CHARLES CRAWLEY, M.A., late Fellow of Downing College, Cambridge.

(A) ENGLISH, LATIN, GREEK, LITERATURE, HISTORY, LAW, MATHEMATICS, &c.

The Term Fee of 2/6 admits to any one class. Each additional class 1/. per term. Practice and Preparation classes free.

ENGLISH.

Tuesday, 8-9.30.—*Literature.—Dryden*... ... ... LIONEL JACOB, B.A.
Thursday, 8.30-10.—*Composition* ... ... H. W. MARCUS.
Monday and Friday, 8-10... ... ...S. STANDRING, Jun., Coll. Fell., and W. WILSON, C.S.

LATIN.

Wednesday, 7.30-8.30.—*Sec.* 1.—*Principia Latina.—Part* 1 *and Easy Translation* W. A. PECK, B.A.
Friday, 9-10.—*Sec.* 2.—*Principia Latina* ... ... G. J. TALBOT, M.A.
Wednesday, 8-9.—*Sec.* 3.—*Beginners* ... ... A. H. HAWKINS, M.A.

GREEK.

Friday, 9-10.—*Advanced* ... ... A. B. SHAW, B.A.
Friday, 8-9.—*Beginners* ... ... A. B. SHAW, B.A.

LAW.

Thursday, 9-10 ... ... HON. ALFRED LYTTELTON. M.A.

MATHEMATICS.

Thursday, 8-10.—*Advanced Algebra.—Logarithms and Trigonometry* ... ... G. TANSLEY, M.A., Coll. Fell.
Thursday, 8-10.—*Algebra.—Elementary* ... ... G. ROWLAND ALSTON, M.A., LL.B.
Monday, 8-10.—*Euclid* ... ... W. R. EMSLIE, C.S.

VOCAL MUSIC.

Saturday, 7.30-8.30.—*Beginners*... ... ... CHARLES ISEARD, F.T.S.C.

(B) SCIENCE.

The Term Fee of 2/6 admits to any one class. Two classes in allied subjects, held on the same night and under the same Teacher, are counted as one class. Each additional class other than these, 1/. per term.

PHYSICAL SCIENCE.

Thursday, 8-9.—**Practical Plane and Solid Geometry* ... ...
Thursday, 9-10.—**Building Construction* ... ... } F. G. CASTLE.
Thursday, 9-10.—**Machine Construction* ... ...
Friday, 7.45-8.45.—**Geology* ... ... }
Friday, 9 10.—**Physiography* ... ... } A. E. SHURLOCK, C.S.
Wednesday, 8-9.30.—**Chemistry* ... ... E. B. CUMBERLAND, B.A., B.Sc.

BIOLOGICAL SCIENCE.

Thursday, 8-9.30.—**Physiology* ... ... ALBERT SARLL
Tuesday, 8.30-9.30.—**Botany* ... ... A. GRUGEON, C.S.

(C) SPECIAL SUBJECTS.

SHORTHAND.—Friday, 7.30-8.30.—*Beginners* ... ... W. E. SLACK.
Tuesday, 8.30-9.30.—*Intermediate* ... ... T. G. MILLER.
Friday, 8.30-9.30.—*Advanced* ... ... LEONARD POCOCK, C.S.

PRACTICE CLASSES.—No extra fees.

Friday, 7.30-8.30.—*Beginners and Intermediate* ... ... LEONARD POCOCK, C.S.
Tuesday, 7.30-8.39.—*Advanced* ... ... T.G . MILLER.
BOOK-KEEPING.—Monday, 7.30-9 ... ... S. WILKINS.

(D) MODERN LANGUAGE AND ART.

The Term Fee of 2/6 does not admit to any class in this Section. The Fee is 2/6 each class in addition to term-fee. Practice and Preparation classes free.

FRENCH.—Conversational practice in all the sections ... ... L. Petré, College de Compiègne.
Wednesday, 7.30-9.—*Literature, Conversation, Idioms, English into French.—Advanced*
Tuesday, 7-8.30 and 8.30-10.—*Reading and Advanced Grammar*
Friday, 7-8.30 and 8 30-10.—*Reading and Easy Translation*
